

No. 17

Talk about having a big heart: The blue whale is the animal with the largest heart. The heart of one blue whale weighed nearly 1,500 pounds!

No. 17

Directions:

Ask each student who has a pet to estimate the pet's weight and list student responses on the board. Find the total weight of the pets. Then, as a class, determine the difference between the pets' weights and the weight of the whale's heart.
