# Heart Hero

## Diya

### Survivor, Grade 9

Diya was born with Transposition of the Great Arteries (TGA), a condition where the main arteries in her heart were switched. At just a week old, Diya underwent a lifesaving heart surgery and has had several others since then. Now, she takes care of her heart by eating lots of fruits and vegetables and staying active through badminton, martial arts and swimming.

Diya is excited to get involved with the American Heart Association and hopes that by participating in the Kids Heart Challenge/American Heart Challenge, she can be an advocate for other kids and families who are facing similar challenges.

The **Kids Heart Challenge** and **American Heart Challenge** funds research that helps kids have longer and stronger lives. Your support helps families have hope and for that they are so grateful.

**Together, we are creating a world of longer, healthier lives.**
